WESTMOUNT PLACE

NOTICE FOR ELEVATOR USE

Please note the following elevator use protocol:

The main control is designed to call the closest elevator to your location, traveling in your desired direction, between passenger elevators one and two, as well as freight elevator three.

The freight control will only call freight elevator three, and should only be used when moving items that could damage the smaller passenger elevators, or those desiring to travel to floors 28 or Parkade-4.

Such items that must be transported only in freight elevator three include, but are not limited to the following: bicycles, scooters, shopping or personal carts, contractor items, and any items which have potential to cause damage to the interior finishings of the elevators.

Elevators are camera monitored, and damage or improper use may result in fines and/or costs associated with negligence and repair.
